WEBSTER GROVES

HIGH SCHOOL

January 2019

Dear Student and Parent(s):

As students progress through their high school years, they face many challenges—along with these challenges comes uncertainty. While many students know exactly what they want to do after graduating high school, some do not. Your Webster Groves High School staff is fully aware of the challenges students and parents face as well as of the decisions to be made. As a staff, we are prepared to assist both students and parents in this very important decision-making process and commit our resources to helping students plan for their futures.

The following *Course Description and Guide to Student Program Planning* is provided to all students to assist in planning course work for their remaining high school years. In addition, the *Guide* also serves as an excellent tool for students when planning a career path. In order to take full advantage of this valuable tool, it is essential that both guardians and students thoroughly review the contents. By reviewing the *Guide* and developing specific goals for the future, students will be prepared to select from the vast array of academic curricula available to them at Webster Groves High School. Additionally, setting specific goals for the future and obtaining the necessary experiences to achieve these goals will guide and prepare students for what they will encounter.

Regardless of the career path a student chooses, our ultimate goal at Webster Groves High School is to work with students to create an environment where they can obtain an enriching educational experience that ultimately prepares them to plan for a bright, successful future.

Should students or guardians have questions pertaining to the *Course Description Guide to Student Program Planning*, please feel free to contact a member of the Webster Groves High School staff.

Sincerely,

Dr. Matt Irvin

Principal, Webster Groves High School
